Lucas Pires Simão

Senior DevOps Engineer | Cloud Architect

Brazilian, 42 years | lucas.piressimao.com.br | linkedin.com/in/lucaspiressimao/

PROFESSIONAL PROFILE

Senior DevOps Engineer with experience designing and operating AWS and Microsoft Azure environments, automating infrastructure with Terraform, and delivering applications through Kubernetes and CI/CD. Background in observability, cloud cost optimization, and PCI compliance in payment and digital services.

PROFESSIONAL EXPERIENCE

QikServe

Senior DevOps Engineer | Dec 2023 – Present

Digital ordering and payment solutions for the hospitality industry.

- Automate AWS and Microsoft Azure infrastructure using Terraform, Shell scripting, and PowerShell.
- Deploy and operate applications using cloud services and Kubernetes, including Amazon EKS and Azure Kubernetes Service (AKS).
- Design and maintain AWS architectures using ECS, EKS, IAM, Auto Scaling, Lambda, S3, RDS, and Control Tower.
- Build and maintain CI/CD pipelines with Jenkins and Azure DevOps to automate builds, testing, and application delivery.
- Monitor application and infrastructure health with Datadog and Amazon CloudWatch.

Technologies: AWS, Azure, AKS, EKS, ECS, Terraform, Kubernetes, Docker, Azure DevOps, Jenkins, Bitbucket, MySQL, Linux, Bash, PowerShell, Datadog.

> Achievements: Introduced AI-assisted integration testing and took responsibility for PCI certification activities.

Hyperlocal

Senior DevOps Engineer | Jan 2023 – Dec 2023

Holding company providing payment, order management, and health and wellness platforms.

- Automated AWS and Microsoft Azure infrastructure using Terraform, Ansible, Python, and Shell scripting.
- Deployed and managed containerized applications using AWS ECS and Kubernetes, including EKS and AKS, to support scalability and availability.
- Designed AWS architectures using ECS, EKS, IAM, Auto Scaling, Lambda, S3, RDS, and Control Tower.
- Built CI/CD pipelines with Azure DevOps, GitHub, and Jenkins, and implemented monitoring and logging with Grafana, CloudWatch, and ELK.

Technologies: AWS, Azure, AKS, EKS, ECS, Azure DevOps, GitHub, Jenkins, Terraform, Ansible, Docker, Kubernetes, Python, Bash, MySQL, PostgreSQL, Linux, Cloudflare.

> Achievements: Rebuilt company deployment environments with a focus on FinOps, performance, and infrastructure architecture.

Worc

Senior DevOps Engineer | Nov 2021 – Jan 2023

Social impact company connecting people with jobs in bars and restaurants.

- Built and maintained CI/CD pipelines with GitLab and AWS CodePipeline, and managed ECS clusters and Docker images.
- Implemented DNS routing with Cloudflare and Route 53, managed RDS databases for SQL Server, MySQL, and PostgreSQL, and maintained secure pfSense VPN services.
- Applied Auto Scaling strategies and configured CloudWatch monitoring and alerts to support availability and incident response.

Technologies: AWS ECS, CodePipeline, Route 53, ALB, NLB, RDS, Lambda, S3, CloudWatch, GitLab, Terraform, Kubernetes, Docker, ELK, Linux, Windows, pfSense.

> Achievements: Built the company's AWS account and cloud infrastructure from the ground up.

Quero 2 Pay

DevOps Engineer | Jul 2020 – Dec 2021

Nationwide payment technology company; supported its evolution into a holding company.

- Built an automated application deployment architecture with GitLab, AWS CodePipeline, ECS, and Docker.
- Implemented WAF protection, managed RDS databases for SQL Server, MySQL, and PostgreSQL, and maintained pfSense VPN and HashiCorp Vault services.
- Established monitoring and alerting, migrated Google Cloud services to AWS, and maintained OCS machine inventory.
- Worked on PCI DSS certification, initiated the PCI PIN process, and supported approval activities with Elo, Mastercard, and Visa.

Technologies: AWS ECS, CodePipeline, Route 53, ALB, NLB, RDS, Lambda, S3, CloudWatch, GitLab, Terraform, Docker, ELK, Linux, Windows, pfSense, Vault.

> Achievements: Built the deployment architecture from scratch and helped achieve PCI DSS compliance.
